Pre-Sale Instructions

Every successful TeamCoin pre-sale starts with an email to francis@dierick.co stating your budget in BTC.

You will receive an offer by email with specific payment instructions and a unique BTC address.

Once payment has been confirmed you will be asked to provide the ETH address where you would like to receive your TeamCoin.

DO NOT USE EXCHANGES such as Coinbase. Verify that your ETH wallet can hold custom coins. When in doubt, ask!

After we have confirmed correctness of payment and ETH address you will receive an IOU Certificate.

We will use these certificates to assign the correct amount of pre-sale coins once the ICO is finished.

IOU Example

Each successful pre-sale buyer will receive a pdf document as pictured above. These pdfs will be used to assign pre-sale tokens to the right ETH addresses once the ICO is finished.

Pre-Sale Recommendations

- Make sure you set a reasonable transaction fee to avoid slow or unconfirmed transactions.
- Currently 280 satoshis / byte is recommended. More info at http://bitcoinfees.21.co
- Unconfirmed transactions will NEVER receive an IOU certificate.
- Make absolutely 100% certain the ETH address on your IOU Certificate is correct & belongs to a wallet that supports contracts & custom tokens.
